

Social Prescriber

With effect from November 2019, we will be offering a new Social Prescribing service to our patients. This initiative puts patients in touch with, and can help them access Organisations, individuals and facilities that provide assistance with issues such as : loneliness & isolation, low mood / anxiety, weight and fitness, drug & alcohol misuse, bereavement, money & debt management, housing problems, employment difficulties and many other issues and problems. Our newly appointed Social prescriber, Ms Roisin Reilly, will work closely with the local Council, Social Services, Public Health departments, Community and Voluntary services to ensure that patients are directed to the appropriate service(s) to support their wellbeing. If you would like to see our Social Prescriber, please ask your GP for a referral.
